---

## SUMMARY

Applied AI engineer who builds and ships LLM pipelines, AI copilots, and multimodal systems in production. Have taken AI features from agent design through deployment across enterprise and startup settings. Comfortable working through ambiguous problems and adjusting quickly as model capabilities change.

## EDUCATION

**Vellore Institute of Technology, Chennai**

Sep 2021 – Sep 2025

B.Tech, Computer Engineering — Artificial Intelligence and Machine Learning Specialization

## WORK EXPERIENCE

**Systems Engineer** | Tata Consultancy Services (TCS)

Sep 2025 – Present

- Built Microsoft Power Automate (Desktop and Cloud) pipelines that turn business requirements into structured, repeatable workflows.
- Designed hybrid automation systems combining AI-driven and rule-based logic, cutting manual work across several enterprise business units.

## INTERSHIPS

**Systems Engineer Intern** | Tata Consultancy Services (TCS)

Apr – May 2025

- Built and deployed a customer-facing AI copilot straight into production, cutting employee workload by over 90% while handling real user traffic at scale.
- Integrated multimodal LLMs into inference pipelines handling real-time text and visual data.

**Computer Vision Trainee** | Intel – Unnati Industrial Training

May – Jul 2024

- Developed image stitching algorithms for overhead cameras on robotic systems, improving visual data accuracy.
- Optimized real-time image transformation in ROS and Gazebo for production robotics use.

**Artificial Intelligence Developer Intern** | XGen Systems

Aug – Oct 2023

- Built a production LLM agent on AWS using Llama-2-7b and LangChain for automated meeting analysis, improving system performance by 30% and output accuracy by 25%.

## PROJECTS

**Automated Document Summarization Tool** — Python, LangChain, FastAPI, Hugging Face

- Built an LLM-powered FastAPI service for document summarization, cutting processing time by 50% while holding 95% accuracy on 10,000-word documents.

**Multimodal YouTube Transcript Summarizer** — Azure Storage, Azure Speech Services, Power Automate

- Built a multimodal AI agent using Azure Speech Services to process audio, video, and text, improving key-point extraction by 50% and content relevance by 40%.

**AI Stock Analysis Tool** — Python, Yahoo Finance, Selenium

- Built a real-time market forecasting tool that pulls live financial data and surfaces structured trading insights.

## SKILLS

**Languages:** Python, SQL

**AI and LLM Frameworks:** LangChain, Hugging Face (Transformers), PyTorch, Keras, Scikit-learn, FastAPI

**Cloud and Tools:** Microsoft Azure (Storage, Speech Services), AWS, Microsoft Power Automate, OpenCV, ROS, Gazebo

**Domains:** Applied AI, LLM Systems, AI Agent Architectures, AI Copilots, Multimodal AI (Text, Vision, Audio), Generative AI, RAG, Workflow Automation, NLP

**Data:** Pandas, NumPy, Matplotlib

## CERTIFICATIONS

NPTEL Python – Silver Medal (IIT Madras)

Unstructured Data Preprocessing for RAG Apps and Large Language Models (Udemy)
