📁 Professional Experience

- | | |
|---------------------|--|
| Sep 2025 – Present | Tata Consultancy Services (TCS)
<i>Systems Engineer</i> <ul style="list-style-type: none">• Proficient in Designing and Automating Workflows with Microsoft Power Automate: Expertise in both Power Automate Desktop and Cloud platforms to streamline business processes, enhance efficiency, and reduce manual workload through intelligent automation.• Advanced Automation Skills in Microsoft Power Automate: Skilled in leveraging Power Automate Desktop and Cloud solutions to create complex automated workflows, optimizing operations and driving digital transformation for businesses. |
| Apr 2025 – May 2025 | TCS Internship
<i>Intern</i> <ul style="list-style-type: none">• Customer Interaction ChatBot for immediate deployment, reducing the employee load by more than 90%• Deployed state-of-the-art multi-modal LLMs for data processing. |
| May 2024 – Jul 2024 | Intel
<i>Intel Unnati Industrial Training</i> <ul style="list-style-type: none">• Developed new methods for image stitching tailored for overhead cameras, enhancing accuracy and efficiency in visual data integration• Optimized image transformation techniques within virtual environments using ROS programming and Gazebo for real-time applications.• Technologies Used: Virtual Machines, Computer Vision, Image Transformation, ROSS Programming, Gazebo |
| Aug 2023 – Oct 2023 | XGen Systems
<i>AI Developer Intern,</i> <ul style="list-style-type: none">• Engineered a meeting summarizer using AWS, Llama-2-7b, and Langchain.• Enhanced tool performance and accuracy by 30% and 25%, respectively, through strategic optimizations.• Technologies Used: Langchain,python LLMs |

🎓 Education

- | | |
|--------------------|---|
| Sep 2021 – present | Vellore Institute of technology, Chennai
<i>Btech in Computer Engineering with Specialization in Artificial intelligence and Machine Learning</i>
GPA : 8.03 |
|--------------------|---|

📁 Projects

AI Stock Analysis Tool

•An AI-driven tool for real-time stock market analysis, enhancing forecasting accuracy and delivering actionable insights.

Technologies Used: **Python, Yahoo Finance, Selenium**

Automated Document Summarization Tool

•An automated document summarization tool, reducing summarization time by 50% and generating summaries with 95% accuracy.

• Applied NLP algorithms to create concise summaries for documents averaging 10,000 words, enhancing information retrieval efficiency.

Technologies Used: **Python, Langchain, FastAPI, LLMS (Hugging Face)**

Advanced YouTube Video Transcript Summarization System (On Azure)

• A web application for summarizing YouTube video transcripts, improving key point extraction efficiency by 50%.

• Leveraged Azure Speech Services to enhance summary accuracy, achieving a 40% improvement in content relevance.

• Technologies Used: **Azure Storage, Azure Speech Services, Microsoft Power Automate**

Skills

Programming Languages:

Python

Cloud Platforms:

Azure (Storage, Speech Services)

Machine Learning:

Scikit-learn, Pytorch, Keras

NLP & Transformers:

Langchain, Hugging Face, LLMs

Computer Vision:

OpenCV, Image Transformation

Data Analysis:

Pandas, NumPy, Matplotlib, SQL

Technologies:

Machine Learning, Deep Learning, Natural Language Processing (NLP), Langchain, Large Language Models (LLM)

Web Development:

FastAPI, HTML

Certificates

NPTEL Certification

Silver medalist in Python certification by IIT Madras

CISCO packet tracers

Network simulation and troubleshooting certification

Build local LLM applications using Python and Ollama

Build local LLM applications using Python and Ollama, which are completely private and secure

Spoken Tutorial IIT Bombay

Python, Java, C, C++ ,SQL certification by IIT Bombay

Udemy: Unstructured Data Preprocessing for RAG Apps & LLMs

Handling Unstructured Data with ViT, Metadata, Advanced Chunking, Hybrid Search, and RAG Techniques
